

WHERE ARTERIAL WOULD COME OVER NEW BRIDGE — The Fifth Ward North-South Arterial, after crossing Mohawk River on new bridge, would come high above New York Central Railroad tracks and Cherry St., and begin descent to grade level through removal of these buildings located on the east side of Railroad St. The east side of Railroad St. was favored because it leads directly into Church St. The arterial would come to street level at the East Main and Church Sts. intersection. (This is the first in a series of photos showing approximate course of the north-south and east-west route proposals.)
