

## *Arterial Scrapbook No. 39*

**NEW STREET ACROSS PARKING LOT** - In addition to the major traffic flows over Routes 5 and 30, the Amsterdam Arterial Plan provides for a secondary westbound artery. It will run from Church St. a short distance north of Grove, over a new Chuctanunda Creek bridge, across the lower section of the Market Street Parking Lot, and intersect Market St. to continue west along Guy Park Ave. The section of the parking lot

to be used is at the lower left in this photo, taken from the east bank of the Chuctanunda. An eastbound counterpart of this new west route will cut from Division St. near the Amsterdam Savings Bank directly across Market to Grove and it is believed that the two main routes and two auxiliary routes will facilitate the flow of traffic through the center of the city.
